## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-3, 5-15, 17-25, 30 and 32-35, are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art fails to teach "transmitting, by the targeted wireless device, a packet indicating the determined signal strength of the received packet to the transmitting wireless device via the wireless channel and a request for a transmitted power; and transmitting, by the transmitting wireless device, an indication of the transmitted power level wherein the target wireless device generates a power request indication based upon the received signal carrying the indication of the transmitted power level for the previous transmission", as cited in the claim.

Regarding independent claim 8, the prior art fails to teach "transmitting, by the targeted wireless device, the determined signal strength of the packet to transmitting wireless device and transmitting a request for a transmitted power level, determining, by the transmitting wireless device, adequacy of the first power level based on the determined signal strength; when the first power level is not adequate, determining, by the transmitting wireless device, a second power level for the transmitting wireless device based on the determination of the adequacy of the first power level", as cited in the claim.

Regarding independent claims 13, 21, 24, 29 and 33, the prior art fails to teach "transmit a packet indicating the determined signal strength for the received packet to the access point

via the wireless channel and requesting transmission of a previously transmitted power level", as cited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
